BPES Project Management Exam 2025

General Feedback

The overall performance on the exam was strong and reflects a good understanding of the material taught in class.

The exam was divided into two sections, each assessing different skills.

Section A – True/False Questions (25% of the total mark):

This section included 25 True/False questions, each requiring a short explanation.

- Most students performed well in this part, scoring at a minimum of 50% of the allocated grades, showing good knowledge of key concepts.
- Higher-scoring students were able to identify the correct answers and provide accurate and well-reasoned explanations.
- Statements 3, 8, 10, 15, and 21 were particularly challenging for many students.

Section B – Structured Questions (75% of the total mark):

This section had a greater impact on overall performance, as it allowed students to demonstrate deeper understanding/analysis and attain higher grades.

- **Questions 2 and 3** were generally well answered, with many students achieving high marks.
- **Question 1**, especially part (d), was more difficult, as it asked students to answer an analytical question. Many found this part challenging.
- **Question 4** was the most difficult in the exam. It clearly distinguished stronger students from those with average performance.
    - A significant number of students did not attempt this question, suggesting it was particularly challenging.
