BUSI60046 Project Management Group assignment

Group Members:

Name: Nora Luo

Name: Arnav Bhatia

Name: Callum Hargrove

Name: Zubayr Ghufoor

Name: Diyona Dsouza

Name: Ewan Ginger

Feedback:

The report is comprehensive, with commendable content, as highlighted by an extensive introduction section that outlines the anticipated project exploration. However, there are areas for improvement. Although the report adequately presents the resulting effects of the project's failures, it does not introduce any possible mitigation measures at the project's onset. Including these would allow for an easier comparison of performance by examining shortcomings, and would further support the evaluation in relation to the initial objectives. Additionally, this could have been reflected in the lessons learned by assessing the efficiency of project controls and their benefits to future projects—beyond those limited to project failure.
